Providing dedicated Connectivity

# Dedicated Point to Point Leased Line

For dedicated point to point speech, private wire, video and data circuits BSNL provides domestic lease line circuits at very competitive rates.

- State of art network is available with BSNL to provide leased circuits in any part of the country.
- Leased circuits are provided to subscribers for internal communication between their offices/factories at various sites within a city/town or different cities/towns on point to point basis, or on a network basis interconnecting the various sites. The charges depend on the distance and band width hired.
- The charges are as per Tariff circular from TRAI and BSNL offers handsome discount on the charges prescribed by TRAI.
- **Data Circuits/Video circuits** - Local or Long distance data/video circuits of bandwidth up to 155Mbps or more are provided:
- Customer can take bandwidth only on a dedicated circuit from BSNL and use its own customer premises equipment as per requirement or can take support from BSNL empanelled agencies.

## **BSNL domestic lease line circuits are used:**

- Financial institutions including Banks
- Travel agents
- Computerized Reservations System (CRS) service providers owned by airlines
- Government organizations
- Companies with branch offices at different places
- Other non-banking financial institutions.
- Cable TV service providers
- e-Gov. Services
